

Adam King - Comp 5130 - Assignment 0: Survey

Person ID	Problem	App/Website Found [name]/None	Likes	Don't Likes	Improvements
1	Keep track of subscriptions and their prices	Truebill App	Seems to accomplish the desired task of tracking subscriptions and can help eliminate subscriptions that aren't worth it.	Have to pay yearly for the app, essentially another subscriptions	lower/remove yearly subscription cost for the app
2	Track "manga"/comic chapter releases	https://www.mangaupdates.com/	Seems to have a lot of info and updates	Difficult to "get into" the website. Lots of info on screen, hard to figure out how to use it for what you want at first glance	UI improvements, a sort of "simple mode" with less info being presented.
3	Finding best place to purchase car given that you typically are expected to negotiate down with dealers	https://www.truecar.com/	Helps gauge the "true" value of a car as the name suggests to make negotiating prices easier if it must be done.	Due to direct connection with dealers, signing up for the website can cause users to get spammed with messages about car offers. Sometimes lists cars that are sold out and cannot be purchased at the given price	More of an "on demand" system where it shows info when you want it but doesn't keep sending you things. Don't list cars not currently available for sale at the given price.

4	Way to pick/suggest a local restaurant to eat at when nobody can decide on anything	https://eatspicer.com/	Seemingly “works” and can take an address and recommend a restaurant within a given distance of address	Painful UI to use	Suggest more than one restaurant at a time, make filtering easier.
